Summary

Computer Science graduate and Software Engineer with experience supporting technical initiatives, coordinating application updates, investigating operational issues, and collaborating with cross-functional teams. Skilled in data analysis, documentation, requirements gathering, problem-solving, and tracking technical issues through resolution. Experienced in using Python, SQL, and application management tools to validate information, improve workflows, and support informed decision-making. Currently pursuing a Master of Science in Computer Science & Artificial Intelligence.

Education

Master of Science in Computer Science & Artificial Intelligence — Expected Dec 2027
Boston University — *Boston, MA*

Bachelor of Science in Computer Science — Aug 2022 – May 2025
University of Minnesota Duluth — *Duluth, MN*

Minor in Mathematics — Aug 2022 – May 2025
University of Minnesota Duluth — *Duluth, MN*

Skills

Project Coordination: Project Documentation, Task Tracking, Requirements Gathering, Issue Tracking, Workflow Coordination, Cross-Functional Collaboration.

Data Analysis & Problem-Solving: Python, SQL, Data Validation, Data Analysis, Root Cause Analysis, Data Interpretation, Application Testing.

Technical Tools & Applications: Firebase, REST APIs, Git, GitHub, Linux, Windows, Flutter, Dart, Microsoft Office.

Communication & Documentation: Stakeholder Communication, Technical Documentation, Status Reporting, Process Improvement, Agile Development.

Experience

Software Engineer — May 2025 – Present
Windward Labs — *Remote*

- Gather and analyze technical requirements, investigate application issues, and identify dependencies and potential obstacles affecting project progress.
- Use Python and SQL to validate application data, investigate inconsistencies, and prepare findings that support technical decision-making.
- Maintain technical documentation, track identified issues, test application changes, and configure Firebase services to support application functionality and secure user access.

Software Engineer Intern — Nov 2024 – May 2025
Windward Labs — *Remote*

- Supported application development initiatives by investigating technical issues, documenting defects, and coordinating issue resolution with technical leads.
- Assisted with testing application updates and validating system functionality across staging and production environments.
- Communicated technical findings, documented identified problems, and supported follow-up activities to help ensure issues progressed toward resolution.
- Used Git and Agile development practices to coordinate technical updates and collaborate with development team members.

Samsung Home Theater Specialist Aug 2025 – Present

Best Buy *Hopkins, MN*

- Consult with customers to understand requirements, identify technical challenges, and recommend solutions based on their needs.
- Troubleshoot hardware, networking, and connected-device integration issues by identifying problems and coordinating appropriate resolutions.
- Translate complex technical information into clear recommendations for customers with varying levels of technical knowledge.
- Collaborate with team members to coordinate customer requests, resolve issues, and support daily operational activities.

Projects

Amazon Books Comparison & Inventory Tracking App

- Developed a cross-platform application using Flutter and Dart to support product searches, inventory tracking, and price comparisons.
- Organized application requirements and designed Firebase data structures to support accurate product and inventory information.
- Tested application functionality, validated data workflows, and investigated issues to improve application reliability.
